## DETAILED ACTION

### Status of the Application

1. Receipt of Applicant's Remarks and Arguments filed on 30<sup>th</sup> July 2007 is acknowledged. However, the arguments for the rejection are not found persuasive and as such, the following rejection has been maintained.

### *Response to Arguments*

2. Applicant's arguments filed on 30<sup>th</sup> July 2007 have been fully considered but they are not persuasive.

The thrust of the applicants' arguments is that there is no indication in the **Devon et al** that the cycloaliphatic radicals should be joined to the phosphorus and the linking CR3R4 via a tertiary carbon atom.

The examiner does not find these arguments persuasive. **Devon et al** clearly suggested to one having ordinary skill in the art that the R<sub>1</sub> and R<sub>2</sub> is a cycloaliphatic radicals and substituted derivatives thereof, and Y is a phosphorus [see col.3]. **Devon et al** also showed these R<sub>1</sub> and R<sub>2</sub> groups are directly attached to Y group [see col.2]. However, **Devon et al** further limited cycloaliphatic radicals to 4-8 ring carbons. The difference is 2 carbon atoms in the ring size. It would have been obvious to one ordinary skill in the art at the time of the invention to modify the teachings **Devon et al** and make instant catalyst system, such as cycloaliphatic radical of 10 ring carbons, since it is within scope of artisan through routine experimentation, to develop a more efficient catalyst system with a reasonable expectation of success. One would have

Art Unit: 1621

been motivated to this because **Devon et al** teach sterically hindered phosphines provide enhanced catalyst activity [col.15, lines 49-53].

So, it would have been obvious to a person of ordinary skill in the art at the time of the invention was made, to use the teachings of **Devon et al**, with a reasonable expectation of success of making the catalyst system of instant claims.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. Claims 1-2, 5-7, 11, and 19 are again rejected under 35 U.S.C. 103(a) as being unpatentable over **Devon et al** (US 4,960,949) in view of **Eastham et al** (6,984,668) for the reasons of record.

6. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136 (a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
